We all dream of our life in the future. What do you think it will be like?

Maybe in the future people will fly into space and spend their holiday on the moon. And some people will live under the sea. There will be robots in our houses. Women won't need to do housework. Robots will help them to do everything at home. So they will have more time to do other things. We will be able to do shopping without leaving our home.

I'm sure that there will be more e-schools, so children can study at home through the Internet or on TV. They won't go to school every day.
